

K-LOVE is important to me because of the positive impacts it brought to me each and every day with its Christian message. I no longer live in an area that is served by this station but understand clearly its impact as an alternative to secular radio. I now listen via the Internet. It must survive in its current state to continue bringing a positive influence in today's world. The daily broadcasts provide a means to stay positive, stress-free and calm through unsettling times.

As a former resident of Denver, Colorado, the choice of Christian radio would be significantly decreased if K-LOVE were to be displaced by an LPFM. K-LOVE is a vital source of positive, encouraging information in today's world. Radio has significant impact on people today. It is critical that listeners have a choice to traditional secular radio.

K-LOVE's Christian programming and message serves the public's interest as a means of providing hope to people. We are bombarded by so many problems today that it is easy for people to lose hope. This station provides Christ's message each and every day and can help people understand what is really important in life today.

PLEASE do not replace this station with an LPFM.

Respectfully submitted,

Brian D. Henry
